JET ENGINE BOOKS

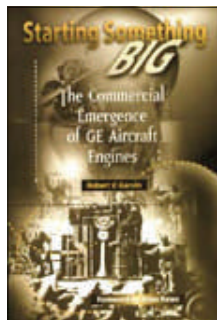

THE DEVELOPMENT OF JET & TURBINE AERO ENGINES – 4th Ed.

Bill Gunston

Expert aviation writer Bill Gunston explains clearly and accessibly the differences between gas-turbine, jet, rocket, ramjet and helicopter turboshaft aero engines, and traces their histories from the early days to the complex units used in today's airliners and military jets. New edition includes Boeing 787 and Rolls-Royce's Trent 1000

P/Back, 238 x 169mm, 264 pages, 250 b&w illustrations #6215 **\$49.95**

STARTING SOMETHING BIG

The Commercial Emergence of GE Aircraft Engines

Robert Garvin

It is the end of the Cold War, defense markets begin to dwindle, and military engine manufacturers brace for the impact. But one makes the transition into the commercial engine market and eventually surpasses the rest. Witness GE Aircraft Engines' success through this enlightening history, and learn how to gain an edge - and start something big of your own!

S/Back, 230 x 155mm, 353 pages, illustrated #1645 **\$49.95**

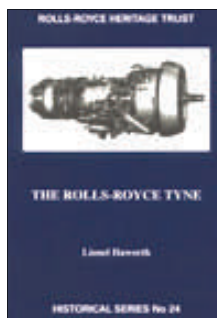

THE ROLLS-ROYCE TAY ENGINE & THE BAC ONE-ELEVEN

K. Goddard

An account of a promising airframe / engine project which failed to find a market.

Good technical detail of the engine projects.

S/Back, A-5, 119 pages, 50+ photos & drawings #8130 **\$36.95**

THE ROLLS-ROYCE TYNE

By L. Haworth

The history & development of the Tyne turboprop engine by it's designer. This book starts at the ancestors of the Tyne, right through Tyne development, to those large turboprops that powered the Vanguard, CL-44, Belfast & a few others. Good technical detail & history.

S/back, A-5, 122 pages, 72 illustrations/photos #8124 **\$36.95**

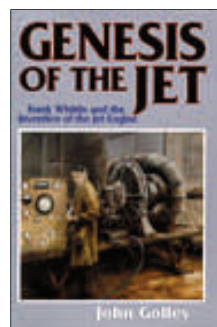

THE ROLLS-ROYCE DART Pioneering Turboprop

R. Heathcote The story of the Dart development, history & production.

A very popular book on the turboprop engine that for many years was a most reliable powerplant, still in service worldwide. Good technical read with many diagrams.

S/Back, A-5, 104 pages, 40 photos #8118 **\$34.95**

GENESIS OF THE JET

Frank Whittle & The Invention Of The Jet Engine

By J. Golley

The story of a genius throttled by British Government bureaucracy. Although gagged for decades by the secrecy of that period, the story is now told in full & these revelations provide a fascinating insight into the attitudes of wartime government & military.

S/Back 220 x 145mm, 332 pages, 56 b&w photos / drawings #7417 **\$49.95**

FAST JETS The History Of Reheat Development At Derby

C. Elliott

Landscape full colour volume recording the work done on reheat / afterburning development from

Derwent to Ardour. Lavishly illustrated, technical drawings & information, a great technical read.

S/Back, A-4, 146 pages, 142 colour illust. #8175 **\$89.95**

JET ENGINE BOOKS

THE ALLISON ENGINE CATALOGUE 1915-2007

By John M. Leonard

The purpose of the superbly presented catalogue published by Rolls-Royce is to identify & provide a top-level summary of as many Allison engines and other products as possible.

This catalogue provides all the products from 1915 up through about 1945, and then products from the aircraft engine / aerospace side of the company up to 2007.

The catalogue is divided into the following sections:

- Piston Engines
- Turboprop, Turboshift, and Propfan Engines
- Turbojet and Turbofan Engines (including Lift Engines)
- Ramjet and Rocket Engines
- Automotive and Industrial Engines
- Development & Demonstrator Engines
- Engines Concepts
- Other Products

Lots and lots of superb photos and technical detail - typical R-R thoroughness, a long time since we have seen a book as good as this!!

A-4 size, 282 pages, 300 b&w photos & drawings

Hardcover #8179 **NZ\$93.00**

Softcover #8178 **NZ\$78.00**
